Product Specification

The elongated, closed front toilet seat shall be made of solid polypropylene plastic. The toilet seat rings shall be slow closing to prevent slamming. The seat shall include a slow-closing hydraulic device. The seat shall quick release from the toilet, allowing for easy access to clean the toilet and seat. The quick release system shall consist of hinge caps that snap open to release, allowing the seat to be pulled forward for removal. The toilet seat shall be ergonomically contoured for both adult and child user comfort. Toilet seat shall be Kohler Model K-4732-_____.
